Programming task for Full-stack developers

Use the https://akabab.github.io/superhero-api/api/ to create a report showing the 10 first superheroes of "**DC Comics**". The report should comply with the following requirements:

Be in **PDF** format
The heroes should be classified by his "**Occupation**"
(For instance, if two heroes are Businessman, the report should create a section for Businessman and show both heroes there)
The information that we expect to see in the report is:

Full Name
Alter Egos
Aliases
Place of Birth Picture of the hero

Use **Python** to create the code
A **copy of the code** (in .zip format) should be provided to SDA before the technical interview

We would like to see comments and well-organized code. Unit tests are not required.
